

TAFNEX™ CF/PP UD tape

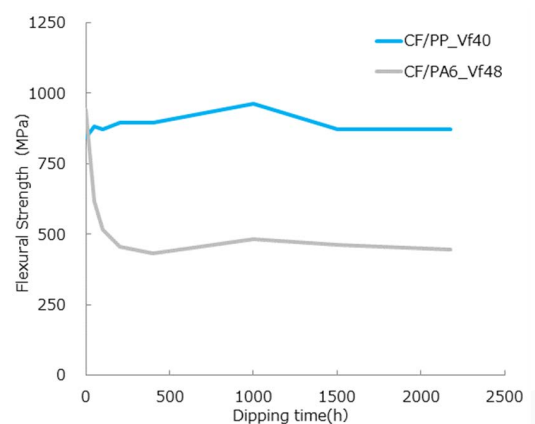

CF:Carbon fiber
PP:Polypropylene

What is TAFNEX™ ?

TAFNEX™ is a unidirectional tape (UD tape) consists of carbon fiber and polypropylene (PP) achieved by unique technology of Mitsui Chemicals. Using this material as reinforcement, it can reduce part weight while retaining strength. The polypropylene matrix offers excellent processability, low moisture absorption and short processing time. TAFNEX™ can be used for a wide range of applications.
